

# PHARMAKO FEATURES IN SPORTS NUTRITION AWARDS

The European Specialist Sports Nutrition awards created by ESSNA (The European Specialist Sports Nutrition Alliance) is designed to honour the most successful products and campaigns within the sports nutrition world. The very first of its kind, our goal is to put on a ceremony that recognise excellences in a rapidly expanding and competitive industry.

The ceremony will be held in at the Kia Oval in London on the 6th December 2019.

Pharmako Biotechnologies are proud to be finalists in three categories:

- Best Sports Nutrition Ingredient: Levagen+
- Most Innovative Idea: LipiSpense®
- 2019 Game Changer: LipiSpense®

ESSNA is the voice of sports nutrition in Europe. Their membership includes big international sport nutrition brands; smaller specialist companies; ingredients' suppliers; and national and sporting associations. ESSNA was founded in 2003 with the intention of creating a forum for discussion and vehicle for actions on the concerns of the specialist sports nutrition sector in order to secure appropriate and proportionate European legislation on sports nutrition products. The awards are judged independently by an esteemed panel of professionals from diverse and well-informed backgrounds. The awards categories will encompass many different elements of the sports nutrition industry and the challenges faced by the sector today, including sustainability, innovation and consumer awareness.
